

Filling instructions

Below is an extract from our filling instructions for the different waste types. Please follow the detailed instructions on the page for each waste type in the online shop. Also note the general information at the end of this document.

Containers with a total weight of more than 10.000 kg may not be transported. Please take care when loading. Overfilled containers will not be transported.

Important: Incorrect filling can cause the waste to be reclassified. It will then be charged as a different type of waste. This may result in higher costs.

Clean construction rubble

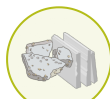

AVV 17 01 07 (European Waste Catalogue code)

Additional names:

- mixtures of concrete, bricks, tiles and ceramics other than those mentioned in 17 01 06
- clean construction rubble
- stones, tiles, bricks, ceramics, concrete, masonry

✓ This may be placed in the container

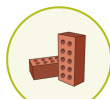

Mineral materials only, with a maximum edge length of 80 cm, such as masonry, bricks, clean broken concrete, tiles (with adhesive), roof tiles, mortar or plaster residue, screed, cement, granite, paving stones, marble, washbasins and toilet bowls (ceramic), mirrors

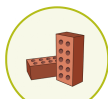

Building rubble

Concrete

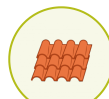

Bricks

Clinker

Tile residues

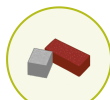

Roof tiles

Screed

Cement

paving stones

Quarry stones

Washbasin, toilet,
shower tray

Mirrors

✗ The following, among other things, may not be placed in the container

Excavated soil (earth, sand, gravel or clay), wood, sheeting, gypsum and plasterboard, wallpaper remnants, cables or pipes, metals (such as reinforcing steel, expanded metal, radiators), lightweight building blocks (Ytong, Poroton etc.), fireclay, waste glass, roofing felt, bathtubs, insulating materials (such as glass wool, insulation polystyrene etc.), pumice concrete, plastics, window frames, paper or similar, liquids, electrical appliances, motors, hazardous waste such as varnishes and paints, oils, asbestos, tar, mastic asphalt, chemicals

Excavated soil

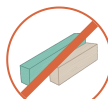

Sand

Gravel

Clay

Untreated wood

Plastic sheeting

Plasterboard

Wallpaper residues

Cable

plastic pipes

Metal pipes

Metal

Lightweight materials

Window glass

Roofing felt
containing bitumen

Bathtub made of
metal

Insulating wool

plastics

Window frames

Paper and cardboard

Large electrical
appliances

Paints and varnishes

Materials containing
asbestos

Contaminated construction rubble

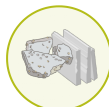

AVV 17 01 07 (European Waste Catalogue code)

Additional names:

- mixtures of concrete, bricks, tiles and ceramics other than those mentioned in 17 01 06
- construction rubble with minor contamination
- stones, tiles, bricks, ceramics, concrete and masonry with contamination

✓ This may be placed in the container

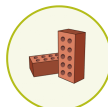

Mineral materials only, with a maximum edge length of 80 cm, such as masonry, bricks, clean broken concrete, tiles (with adhesive), roof tiles, mortar or plaster residue, screed, cement, granite, paving stones, marble, washbasins and toilet bowls (ceramic), mirrors, and materials with minor contamination from the following: excavated soil (earth, sand, gravel or clay), wood, sheeting, wallpaper remnants, cables or pipes, metals (such as reinforcing steel), waste glass, paper or similar

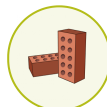

Building rubble

Concrete

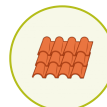

Bricks

Clinker

Tile residues

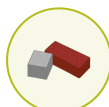

Roof tiles

Screed

Cement

paving stones

Washbasin, toilet,
shower tray

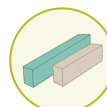

Excavated soil

Sand

Clay

Untreated wood

Plastic sheeting

Wallpaper residues

Cable

plastic pipes

Metal pipes

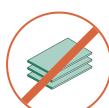

Window glass

Paper and cardboard

✗ The following, among other things, may not be placed in the container

Plasterboard, lightweight building blocks (Ytong, Poroton etc.), fireclay, roofing felt, insulating materials (such as glass wool, insulation polystyrene etc.), pumice concrete, plastics, window frames, bathtubs, liquids, electrical appliances, motors, hazardous waste such as varnishes and paints, oils, asbestos, tar, mastic asphalt, chemicals

Plasterboard

Lightweight materials

Roofing felt
containing bitumen

Insulating wool

plastics

Window frames

Bathtub made of
metal

Large electrical
appliances

Paints and varnishes

Materials containing
asbestos

Tar paper

Mixed construction waste (light)

AVV 17 09 0401 (European Waste Catalogue code)

Additional names:

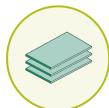

- mixed construction and demolition waste other than that mentioned in 17 09 01, 17 09 02 and 17 09 03
- mixed waste
- waste from renovation, clear-outs, construction sites, etc.

✓ This may be placed in the container

Other renovation waste, such as wallpaper remnants, plasterboard, Fermacell boards, Heraklith, cable and pipe remnants, plaster residue, untreated solid wood, single-use pallets, beams, squared timber, boards, planks, crates, wood shavings etc., untreated interior door leaves and frames, profiled boards for interior finishing, ceiling panels, decorative beams etc., wooden furniture, broken glass, cutting discs and abrasive paper, metals and scrap, sheeting and empty plastic buckets, wood-wool boards (HBCD-free), textiles, gypsum, lightweight boards, long-fibre wood wool, carpets, buckets, packaging waste

Wallpaper residues

Plasterboard

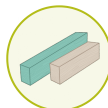

Cable

plastic pipes

Gypsum and plaster

Untreated wood

Doors

Ceiling panels

Wooden furniture

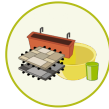

Window glass

Metal

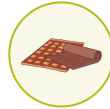

Plastic sheeting

plastics

Textiles

Carpet

Packaging material

✗ The following, among other things, may not be placed in the container

Construction rubble such as sanitary ceramics (toilet bowls, washbasins, shower trays etc.), tiles, plaster etc., pumice, porous and aerated concrete blocks (such as Ytong), A4 wood, food waste, tar-containing roofing felt, insulating materials (such as glass wool, insulation polystyrene etc.), asbestos-containing building materials or similar, electrical appliances, motors, hazardous waste such as varnishes and paints, oils, asbestos, tar, mastic asphalt, chemicals

Washbasin, toilet, shower tray

Tile residues

Lightweight materials

Wooden fence / hunter's fence

Food leftovers

Tar paper

Insulating wool

Materials containing asbestos

Large electrical appliances

Paints and varnishes

Mixed construction waste (heavy)

AVV 17 09 0401 (European Waste Catalogue code)

Additional names:

- mixed construction and demolition waste other than that mentioned in 17 09 01, 17 09 02 and 17 09 03
- mixed waste
- waste from renovation, clear-outs, construction sites, etc.

✓ This may be placed in the container

Construction rubble such as sanitary ceramics (toilet bowls, washbasins, shower trays etc.), tiles, plaster etc. – all the materials listed above together must account for no more than 15% – and other renovation waste, such as wallpaper remnants, plasterboard, Fermacell boards, Heraklith, cable and pipe remnants, untreated solid wood, single-use pallets, beams, squared timber, boards, planks, crates, wood shavings etc., untreated interior door leaves and frames, profiled boards for interior finishing, ceiling panels, decorative beams etc., wooden furniture, broken glass, cutting discs and abrasive paper, metals and scrap, sheeting and empty plastic buckets, wood-wool boards (HBCD-free), textiles, gypsum, lightweight boards, long-fibre wood wool, carpets

Washbasin, toilet, shower tray

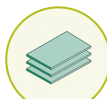

Tile residues

Gypsum and plaster

Wallpaper residues

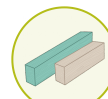

Plasterboard

Cable

plastic pipes

Untreated wood

Doors

Ceiling panels

Wooden furniture

Window glass

Metal

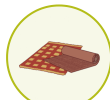

Plastic sheeting

plastics

Textiles

Carpet

✗ The following, among other things, may not be placed in the container

A4 wood, tar-containing roofing felt, food waste, insulating materials (such as glass wool, insulation polystyrene etc.), asbestos-containing building materials or similar, electrical appliances, motors, hazardous waste such as varnishes and paints, oils, asbestos, tar, mastic asphalt, chemicals

Wooden fence / hunter's fence

Food leftovers

Tar paper

Insulating wool

Materials containing asbestos

Large electrical appliances

Paints and varnishes

Green waste with diameters also over 15 cm

AVV 20 02 01 (European Waste Catalogue code)

Additional names:

- biodegradable waste
- garden waste with a diameter over 15 cm
- garden waste, trunks, branches, roots and stumps (diameters may also exceed 15 cm)

✓ This may be placed in the container

Organic materials only, such as garden waste including grass cuttings, shrubs, weeds, twigs, branches, roots etc. that are not infested by pests (such as the box-tree moth), as well as trunks and stumps with a diameter over 15 cm

Green waste

Lawn clippings

leaves

Branches

Roots and stumps

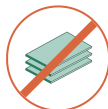

Trunks over 15 cm

✗ The following, among other things, may not be placed in the container

Sheeting, gypsum and plasterboard, wallpaper remnants, cables or pipes, metals (such as reinforcing steel, expanded metal, radiators), lightweight building blocks (Ytong, Poroton etc.), waste glass, roofing felt, insulating materials, window frames, food waste, paper, excavated soil (earth, sand, gravel or clay), treated wood, reeds, liquids, hazardous waste such as varnishes, oils, electrical appliances, asbestos, tar, mastic asphalt, chemicals

Plastic sheeting

Plasterboard

Wallpaper residues

Cable

plastic pipes

Metal pipes

Metal

Lightweight materials

Window glass

Roofing felt containing bitumen

Insulating wool

Window frames

Food leftovers

Paper and cardboard

Excavated soil

Sand

Gravel

Clay

Wooden fence / hunter's fence

reeds and bamboo

Large electrical appliances

Paints and varnishes

Materials containing asbestos

Green waste with a maximum diameter of 15 cm

AVV 20 02 01 (European Waste Catalogue code)

Additional names:

- biodegradable waste
- garden waste, maximum diameter 15 cm
- garden waste, green waste, twigs, grass cuttings (maximum diameter 15 cm)

✓ This may be placed in the container

Organic materials only, such as garden waste including grass cuttings, shrubs, weeds, twigs, branches etc. that are not infested by pests (such as the box-tree moth)

Green waste

Lawn clippings

leaves

Branches

✗ The following, among other things, may not be placed in the container

Trunks and stumps with a diameter over 15 cm, roots, sheeting, gypsum and plasterboard, wallpaper remnants, cables or pipes, metals (such as reinforcing steel, expanded metal, radiators), lightweight building blocks (Ytong, Poroton etc.), waste glass, roofing felt, insulating materials, window frames, food waste, paper, excavated soil (earth, sand, gravel or clay), treated wood, reeds, liquids, hazardous waste such as varnishes, oils, electrical appliances, asbestos, tar, mastic asphalt, chemicals

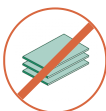

Roots and stumps

Trunks over 15 cm

Plastic sheeting

Plasterboard

Wallpaper residues

Cable

plastic pipes

Metal pipes

Metal

Lightweight materials

Sand

Gravel

Clay

Wooden fence / hunter's fence

reeds and bamboo

Large electrical appliances

Paints and varnishes

Materials containing asbestos

Bulky waste

AVV 20 03 07 (European Waste Catalogue code)

Additional names:

- bulky waste

✓ This may be placed in the container

Bulky household waste and household contents such as furnishings and furniture of all kinds (such as beds, kitchen units, chairs, tables, sofas, cupboards, shelves, desks), mattresses, glass (such as mirrors, household glass and window glass – these types of glass together must not exceed 10%), slatted bed bases, textiles (such as clothing and curtains), plastics (such as CDs, kitchen utensils and toys), carpets, pots, pans, crockery, cutlery, garden tools, sanitary ceramics (toilet bowls, washbasins, shower trays etc.), aquariums, MDF boards, chipboard, parquet, laminate, blinds, decorations, bicycles, door frames and interior doors, wallpaper

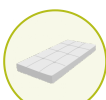

Wooden furniture

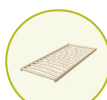

kitchen furniture

Office furniture

Mattress

slatted frame

Mirrors

Window glass

Textiles

plastics

Carpet

Pots and pans

Ceramic dishes

Garden tools

Washbasin, toilet,
shower tray

Pressed chipboard

parquet

laminate

Blinds

Decoration

Doors

Wallpaper residues

✗ The following, among other things, may not be placed in the container

Construction rubble, tiles, plaster etc., pumice, porous and aerated concrete blocks (such as Ytong), A4 wood, food waste, tar-containing roofing felt, insulating materials (such as glass wool, insulation polystyrene etc.), asbestos-containing building materials or similar, electrical appliances, motors, radiators, hazardous waste such as varnishes and paints, oils, asbestos, tar, mastic asphalt, chemicals

Building rubble

Tile residues

Gypsum and plaster

Lightweight materials

Wooden fence /
hunter's fence

Food leftovers

Tar paper

Insulating wool

Materials containing
asbestos

Large electrical
appliances

Radiators

Paints and varnishes

Clean excavated soil

AVV 17 05 04 (European Waste Catalogue code)

Additional names:

- soil and stones other than those mentioned in 17 05 03
- clean excavated soil
- sand, soil, earth

✓ This may be placed in the container

Excavated soil only (earth, sand or topsoil)

Excavated soil

Sand

✗ The following, among other things, may not be placed in the container

Organic materials such as grass, turf, shrubs, green waste, leaves, roots etc.; pebbles and stones larger than 10 cm; mixtures of clay and straw; polluted or contaminated soil; mineral materials such as masonry, bricks, broken concrete, tiles, roof tiles, mortar or plaster residue, washbasins and toilet bowls (ceramic); wood, sheeting, lightweight building blocks (Ytong, Poroton etc.), roofing felt, plastics, hazardous waste such as varnishes, oils, electrical appliances, asbestos, tar, mastic asphalt, chemicals

Turf

Green waste

leaves

Roots and stumps

Gravel

Quarry stones

Clay

Bricks

Concrete

Tile residues

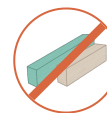

Roof tiles

Gypsum and plaster

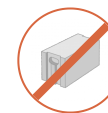

Washbasin, toilet, shower tray

Untreated wood

Plastic sheeting

Lightweight materials

Roofing felt containing bitumen

plastics

Paints and varnishes

Large electrical appliances

Materials containing asbestos

Excavated soil with minor contamination

AVV 17 05 04 (European Waste Catalogue code)

Additional names:

- soil and stones other than those mentioned in 17 05 03
- excavated soil with contamination
- sand, soil and earth with contamination

✓ This may be placed in the container

Excavated soil only (earth, sand, topsoil) with small proportions of clay, gravel, organic materials such as grass, shrubs and turf, and mineral materials such as masonry, bricks, broken concrete, tiles, roof tiles, mortar or plaster residue (maximum 10% in total)

Excavated soil

Sand

Clay

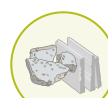

Gravel

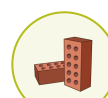

Turf

Green waste

Building rubble

Bricks

Concrete

Tile residues

Roof tiles

Gypsum and plaster

✗ The following, among other things, may not be placed in the container

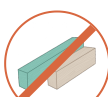

Green waste and leaves, roots, wood, sheeting, gypsum and plasterboard, wallpaper remnants, cables or pipes, metals (such as reinforcing steel, expanded metal, radiators), lightweight building blocks (Ytong, Poroton etc.), waste glass, roofing felt, insulating materials, window frames, paper, liquids, plastics, hazardous waste such as varnishes, oils, electrical appliances, asbestos, tar, mastic asphalt, chemicals

leaves

Roots and stumps

Untreated wood

Plastic sheeting

Plasterboard

Wallpaper residues

Cable

plastic pipes

Metal pipes

Metal

Lightweight materials

Window glass

Roofing felt containing bitumen

Insulating wool

Window frames

Paper and cardboard

plastics

Large electrical appliances

Paints and varnishes

Materials containing asbestos

Wood

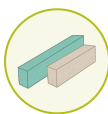

AVV 17 02 01 (European Waste Catalogue code)

Additional names:

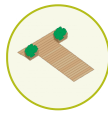

- wood
- wood (AI–AIII)

✓ This may be placed in the container

Primarily natural, untreated wood without a surface treatment such as paint, stain or varnish. Examples include beams, boards, veneered wood, pallets, wooden crates and offcuts

Untreated wood

Untreated wood panels

✗ The following, among other things, may not be placed in the container

Furniture, parquet, laminate, railway sleepers, tree trunks, roots, pressure-treated wood, metals, roof beams, varnished wood from outdoor or indoor use, doors, A4 wood, treated wood such as garden fences, wooden palisades and railings, burnt wood, timber framing, hazardous waste such as insulating materials (including glass wool and insulation polystyrene), roofing felt, varnishes, oils, electrical appliances, asbestos, tar, mastic asphalt, chemicals

Wooden furniture

parquet

laminate

Roots and stumps

Trunks over 15 cm

Wooden fence / hunter's fence

Metal

Roof truss

Doors

Insulating wool

Roofing felt containing bitumen

Paints and varnishes

Large electrical appliances

Materials containing asbestos

A IV wood

AVV 17 02 04 (European Waste Catalogue code)

Additional names:

- glass, plastic and wood containing or contaminated with hazardous substances
- wood (AIV)
- varnished wood for outdoor use

✓ This may be placed in the container

Wood from windows, garden fences, picket fences, window frames, door frames, heavily varnished wood, garden sheds, wooden fences, wood treated with preservatives, balcony railings, external doors, wooden garden furniture, timber decking, plant stakes, pressure-treated wood such as fences or treated privacy screens, as well as untreated and treated wood, roof beams and roof structures

Window

Window frames

Exterior door

Wooden fence /
hunter's fence

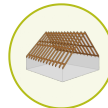

Wooden garden shed

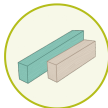

Garden furniture

Wooden terrace

Roof truss

Untreated wood

✗ The following, among other things, may not be placed in the container

Furniture, parquet, laminate, metals, construction rubble such as masonry, concrete, debris, ceramics, earth, walls, sandstone, roof tiles, screed, soil material, railway sleepers, liquids, pieces of wood with an edge length over 300 cm, hazardous waste such as varnishes, oils, electrical appliances, asbestos, tar, mastic asphalt, chemicals, insulating materials (such as glass wool and insulation polystyrene), roofing felt

Wooden furniture

parquet

laminate

Metal

Building rubble

Concrete

Washbasin, toilet,
shower tray

Excavated soil

Sand

Roof tiles

Screed

Insulating wool

Roofing felt
containing bitumen

Paints and varnishes

Large electrical
appliances

Materials containing
asbestos

Lightweight building materials

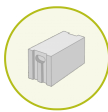

AVV 17 01 07 (European Waste Catalogue code)

Additional names:

- mixtures of concrete, bricks, tiles and ceramics other than those mentioned in 17 01 06
- lightweight building materials (aerated concrete, Ytong blocks)

✓ This may be placed in the container

Lightweight mineral materials only, such as aerated concrete (Ytong, Poroton), pumice and similar

Lightweight materials

✗ The following, among other things, may not be placed in the container

Masonry, bricks, broken concrete, tiles, roof tiles, mortar or plaster residue, washbasins and toilet bowls (ceramic), excavated soil (earth, sand, gravel or clay), wood, sheeting, plasterboard, wallpaper remnants, cables or pipes, metals (such as reinforcing steel, expanded metal, radiators), waste glass, food waste, roofing felt, insulating materials (such as glass wool and insulation polystyrene), window frames, paper, asbestos-containing building materials or similar, liquids, electrical appliances, motors, hazardous waste such as varnishes and paints, oils, asbestos, tar, mastic asphalt, chemicals

Building rubble

Bricks

Concrete

Tile residues

Roof tiles

Gypsum and plaster

Washbasin, toilet,
shower tray

Excavated soil

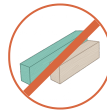

Sand

Gravel

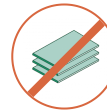

Clay

Untreated wood

Plastic sheeting

Plasterboard

Wallpaper residues

Cable

plastic pipes

Metal pipes

Metal

Window glass

Food leftovers

Roofing felt
containing bitumen

Insulating wool

Window frames

Paper and cardboard

Materials containing
asbestos

Large electrical
appliances

Paints and varnishes

Mixed packaging

AVV 15 01 06 (European Waste Catalogue code)

Additional names:

- mixed packaging

✓ This may be placed in the container

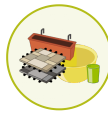

Mixed packaging, packaging materials and other plastics, such as paper and cardboard packaging, plastic packaging, moulded polystyrene parts, polystyrene chips, plastic sacks, plastic buckets, bags, cover sheets, cellulose waste

Packaging material

Paper and cardboard

plastics

Styrofoam packaging

Plastic sheeting

✗ The following, among other things, may not be placed in the container

Construction rubble such as sanitary ceramics (toilet bowls, washbasins, shower trays etc.), tiles, plaster etc., pumice, porous and aerated concrete blocks (such as Ytong), A4 wood, food waste, tar-containing roofing felt, insulating materials (such as EPS/XPS insulation boards, glass wool, KMF), asbestos-containing building materials or similar, electrical appliances, motors, furniture, hazardous waste such as varnishes and paints, oils, asbestos, tar, mastic asphalt, chemicals, wood, metals, earth, soil, building materials, cables

Washbasin, toilet, shower tray

Tile residues

Gypsum and plaster

Lightweight materials

Wooden fence / hunter's fence

Food leftovers

Tar paper

Insulation panels

Insulating wool

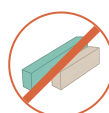

Materials containing asbestos

Large electrical appliances

Wooden furniture

Untreated wood

Metal

Excavated soil

Cable

Paints and varnishes

KMF insulation and mineral wool

AVV 17 06 04 (European Waste Catalogue code)

Additional names:

✓ This may be placed in the container

Soft mineral wool, insulation wool, glass wool, rock wool and man-made mineral fibres (KMF), asbestos-free and packed only in the bags provided

Insulating wool

✗ The following, among other things, may not be placed in the container

All other waste; the material must be disposed of separately by type. This includes asbestos, pumice, porous and aerated concrete blocks (such as Ytong), all construction rubble such as sanitary ceramics (toilet bowls, washbasins, shower trays etc.), tiles, stones of any kind, plaster etc., A4 wood, tar-containing roofing felt, tyres, vehicle parts, aerosol cans, materials containing PCB, liquids, hazardous waste such as varnishes, oils, electrical appliances, tar, mastic asphalt, chemicals

Materials containing asbestos

Lightweight materials

Washbasin, toilet, shower tray

Tile residues

Gypsum and plaster

Wooden fence / hunter's fence

Tar paper

Paints and varnishes

Large electrical appliances

Hazardous KMF insulation and mineral wool

AVV 17 06 03 (European Waste Catalogue code)

Additional names:

✓ This may be placed in the container

Soft mineral wool, insulation wool, glass wool, rock wool and man-made mineral fibres (KMF), packed only in the bags provided

Insulating wool

✗ The following, among other things, may not be placed in the container

All other waste; the material must be disposed of separately by type. This includes pumice, porous and aerated concrete blocks (such as Ytong), all construction rubble such as sanitary ceramics (toilet bowls, washbasins, shower trays etc.), tiles, stones of any kind, plaster etc., A4 wood, tar-containing roofing felt, tyres, vehicle parts, aerosol cans, materials containing PCB, liquids, hazardous waste such as varnishes, oils, electrical appliances, asbestos, tar, mastic asphalt, chemicals

Materials containing asbestos

Lightweight materials

Washbasin, toilet, shower tray

Tile residues

Gypsum and plaster

Wooden fence / hunter's fence

Tar paper

Paints and varnishes

Large electrical appliances

Big Bag for mixed construction waste

✓ This may be placed in the container

Construction rubble such as sanitary ceramics (toilet bowls, washbasins, shower trays etc.), tiles, plaster etc.; other renovation waste such as wallpaper remnants, plasterboard, Heraklith, cable and pipe remnants; pumice, porous and aerated concrete blocks (such as Ytong); untreated solid wood, single-use pallets, beams, squared timber, boards, planks, crates, wood shavings etc.; profiled boards for interior finishing, ceiling panels, decorative beams etc.; wooden furniture, broken glass, cutting discs and abrasive paper, metals and scrap, sheeting and empty plastic buckets

Washbasin, toilet,
shower tray

Tile residues

Gypsum and plaster

Wallpaper residues

Plasterboard

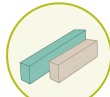

Cable

plastic pipes

Lightweight materials

Untreated wood

Ceiling panels

Wooden furniture

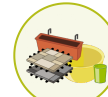

Window glass

Metal

Plastic sheeting

plastics

✗ The following, among other things, may not be placed in the container

Tar-containing roofing felt, insulating materials (such as EPS/XPS insulation boards, glass wool, KMF), asbestos-containing building materials or similar, electrical appliances, treated wood, hazardous waste such as varnishes, oils, asbestos, tar, mastic asphalt, chemicals

Tar paper

Insulating wool

Materials containing
asbestos

Large electrical
appliances

Wooden fence /
hunter's fence

Paints and varnishes

Bituminous mixtures

AVV 17 03 02 (European Waste Catalogue code)

Additional names:

✓ This may be placed in the container

Bituminous roofing felt, roofing membranes, torch-on membrane, roofing shingles, roof covering

Roofing felt
containing bitumen

Roof shingles

✗ The following, among other things, may not be placed in the container

All other waste types, coal tar, tar-containing products, KMF fibres, asbestos fibres

Tar paper

Insulating wool

Materials containing
asbestos

General information

Our containers are not suitable for holding liquids.

Containers with a total weight of more than 10.000 kg may not be transported. Please take care when loading. Overfilled containers will not be transported.

The container may only be filled up to the loading edge. Waste must not protrude above the side walls. Raising the side walls yourself is also prohibited.

There must be sufficient space for the vehicle and unobstructed access. The minimum clearance height is 4 metres and the access width is 3,50 metres. As the container is set down towards the rear, up to 10 metres of space is required. To make manoeuvring easier, an additional length of 10 to 15 metres should be kept clear.

The ground must be suitable, meaning firm, level and load-bearing. Sensitive ground is not suitable for a lorry to drive on and may be damaged by the weight.

If the container is placed in a public space, you are responsible for the general duty to ensure traffic safety. This also applies if we apply for the necessary official placement permits on your behalf.
